REPORT OF THE DIRECTORS

The Board of Directors (the “Board”) of Harbin Electric Company Limited (the “Company”) is pleased to announce the operating results of the Company and its subsidiaries (the “Group”) for the six months ended 30 June 2016, which were prepared in accordance with the Chinese Enterprises Accounting Standard. Such operating results have not been audited but have been reviewed by BDO China Shu Lun Pan Certified Public Accountants LLP.

The currency mentioned in this report was Renminbi.

OPERATING RESULTS

For the six months ended 30 June 2016, the Group recorded an operating revenue of RMB14,794.25 million, an increase of 23.79% as compared with the same period last year. The Group recorded a net profit attributable to the parent company of RMB130.34 million, an increase of 35.68% as compared with the same period last year. Earnings per share were RMB0.09, an increase of RMB0.02 as compared with the same period last year. The Company’s total equity attributable to the owners of the parent company at the end of the period was RMB12,944.57 million, an increase of RMB237.18 million over the beginning of the period; and net assets per share were RMB9.40, an increase of RMB0.17 over the beginning of the period. The increase in profit of Group during the period was mainly attributable to the expansion of sales scale and an increase in gross profit margin.

INTERIM DIVIDEND

The Board does not recommend the payment of an interim dividend for the six months ended 30 June 2016.

INDUSTRY DEVELOPMENT AND BUSINESS REVIEW

During the first half of 2016, facing complications from both the international and domestic fronts with continuous relatively strong pressure of economic downturn, China’s overall national economy sustained a steady and healthy growth, whereas the GDP went up by 6.7% as compared to the same period last year.

According to the statistics of China Electricity Council, during the first half of the year, newly installed capacity of power generating units in China reached 56,990 MW, representing an increase of 13,600 MW as compared with the same period last year, of which newly installed capacity of non-fossil fuel generating units reached 30,240 MW, accounting for 53.1% of newly installed generating units. Newly installed capacity of thermal power generating units was 27,110 MW (including coal power of 21,490 MW), a decrease of 6.4% in investment as compared with the same period last year; newly installed capacity of hydropower generating units was 4,370 MW, a decrease of 17.9% in investment as compared with the same period last year, which was recorded a decline for four consecutive years; wind power investment decreased by 38.4%; and nuclear power investment increased by 5.1% as compared with the same period last year.

Given the overcapacity in power market, utilization hours of thermal power generator equipment were 1964 hours, representing a decrease of 194 hours as compared with the same period last year, being the lowest for the same period in the last decade. The demand for power equipment was worsened due to power surplus. During the first half of the year, the number of new coal power project tenders dropped sharply, while demands for nuclear power products and fuel-fired power generators in the market were insufficient. As the market competition grew increasingly fierce, the prices of product orders decreased. On the other hand, with the gradual implementation of the policy of “cut overcapacity”, execution risk in coal power projects in hand became higher.

Under the severe external environment, the Group addressed the following areas in the first half of this year:

Firstly, we were customer-oriented while securing more orders from the market. We strengthened connections with customers in order to understand their needs and solve their problems;

Secondly, we achieved breakthrough in quality while enhancing competitiveness. We extricated ourselves based on quality through strengthening our quality management as well as scientific and technological innovation, so as to ensure effectiveness in quality and acquire orders in science and technology segment;

Thirdly, we enhanced profitability based on effectiveness. We perfected our procurement system to enhance management, strengthen our control over expenses and reduce cost target in such areas as technology;

Fourthly, we focused on emerging industries while further intensifying structure adjustment. We emphasized on better integration and development of nuclear power and fuel-fired power generators.

In the meantime, we deepened our reform, facilitated our internal structure, adopted a more scientific and reasonable, simple and high-efficiency structure of headquarters and reinforced the headquarters' control and efficiency.

NEW CONTRACTS

During the first half of the year, the value of new contracts secured by the Group amounted to RMB10.280 billion, a decrease of approximately 7.06% from the same period last year, to which export contract contributed RMB0.394 billion, a decrease of 74.73% from the same period last year. Among the contracts in the first half of the year, thermal power accounted for 66.03%; hydropower accounted for 9.02%; nuclear power accounted for 4.24%; conversion and spare parts accounted for 11.10%; and the others accounted for 9.61%.

PRODUCTION AND SERVICES

The capacity of the Group's power equipment produced during the first half of the year was 13,180.1 MW, an increase of 29.9% as compared with the same period last year, among which 2,499.1 MW were generated by 24 water turbine generators, representing an increase of 29.6% as compared with the same period last year; 10,681.0 MW were generated by 28 steam turbine generators, representing an increase of 29.9% as compared with the same period last year; 6,800 MW were generated by 20 utility boilers, representing an increase of 11.9% as compared with the same period last year; while 5,134 MW were generated by 15 steam turbines for power plants, representing a decrease of 23.3% as compared with the same period last year.

OPERATING REVENUE AND COST

As at 30 June 2016, the Group recorded an operating revenue of RMB14,794.25 million, an increase of 23.79% as compared with the same period last year. In particular, operating revenue of main thermal power equipment was RMB5,977.69 million, an increase of 15.34% as compared with the same period last year. Operating revenue of nuclear power equipment was RMB715.56 million, a decrease of 4.74% as compared with the same period last year. Operating revenue of main hydropower equipment was RMB1,452.34 million, an increase of 9.82% as compared with the same period last year. Operating revenue of engineering services for power stations was RMB4,994.19 million, an increase of 81.02% as compared with the same period last year. Operating revenue of ancillary equipment for power stations was RMB598.34 million, a decrease of 28.62% as compared with the same period last year. Operating revenue of AC/DC motors and other products and services was RMB1,056.13 million, a decrease of 3.77% as compared with the same period last year.

During the period, the Group recorded an export turnover of RMB5,177.96 million, accounting for 35.00% of the operating revenue. The exports were mainly to Turkey, Indonesia and Ecuador, among which exports to Asia accounted for 20.99% of the export turnover, whereas exports to Southern America accounted for 11.98% of the export turnover.

During the period, the operating cost of the Group was RMB13,007.45 million, an increase of 22.44% as compared with the same period last year, which is mainly attributable to the growth of scale of operation.

GROSS PROFIT AND GROSS PROFIT MARGIN

As at 30 June 2016, the Group realized a gross profit from operating business of RMB1,786.80 million, an increase of 34.64% as compared with the same period last year. The gross profit margin was 12.08%, an increase of 0.98 percentage point as compared with the same period last year, which was mainly attributable to increase in gross profit margin of hydropower business segment.

Among them, the gross profit from main thermal power equipment was RMB947.34 million and the gross profit margin was 15.85%, a decrease of 1.68 percentage points as compared with the same period last year. The gross profit from nuclear power equipment was RMB118.15 million and the gross profit margin was 16.51%, an increase of 7.55 percentage points as compared with the same period last year. The gross profit from main hydropower equipment was RMB224.13 million and the gross profit margin was 15.43%, an increase of 7.64 percentage points as compared with the same period last year. The gross profit from engineering services for power stations was RMB281.77 million and the gross profit margin was 5.64%, an increase of 1.88 percentage points as compared with the same period last year. The gross profit from ancillary equipment for power stations was RMB94.37 million and the gross profit margin was 15.77%, an increase of 5.5 percentage points as compared with the same period last year. The gross profit from AC/DC motors and other products and services was RMB121.04 million and the gross profit margin was 11.46%, an increase of 4.86 percentage points as compared with the same period last year.

EXPENSES FOR THE PERIOD

As at 30 June 2016, the Group's distribution expenses amounted to RMB262.56 million, a decrease of RMB1.94 million or 0.73% as compared with the same period last year. Administrative expenses incurred amounted to RMB948.90 million, an increase of RMB33.67 million or 3.68% as compared with the same period last year. Finance costs incurred was RMB83.38 million, a decrease of RMB6.51 million or 7.24% as compared with the same period last year.

The increase in expenses for the period is mainly attributable to the increase in expenses from technology research base in Jiangbei for the current period.

ASSETS AND LIABILITIES

As at 30 June 2016, the total assets of the Group amounted to RMB63,032.15 million, a decrease of RMB1,131.10 million or 1.76% over the beginning of the period, among which the current assets were RMB54,985.96 million, representing 87.23% of the total assets, and the non-current assets were RMB8,046.19 million, representing 12.77% of the total assets.

PROSPECTS

In 2016, the global economy remains in slow recovery amidst uncertainties and instabilities. China's economic development has entered the new normal module while the downward pressure keeps growing.

Despite the fact that there is overcapacity in domestic thermal power and thermal power market has entered a wintry stage, the potential of energy saving transformation market is great; meanwhile, the state's vigorous development of non-fossil fuel, hydropower, nuclear power, hybrid will bring about new opportunities. Besides, the implementation of "One Belt One Road" strategy will bring new market opportunities to the power equipment manufacturing entities.

The Group is in the critical moment of reform and development. In the face of harsh market environment and difficult tasks of production operations, the Group will adhere to its innovation-led strategy, accelerate its transformation and upgrading, as well as emphasize its principal operations to enhance effectiveness in marketing, cost cutting, quality, the "outbound" strategy and reformation. The Group will further reform its internal organization and motivate all parties to take initiative to capture the opportunities and attain subsisting healthy development.

The Board sincerely appreciates the continuous support and trust from all shareholders and the efforts of the management and all employees of the Company!
